

2.2. Posts: to update a menu (with PDF format)

- Select the code “[pdf-embedder url=“...”]”
- Click on ”Add Media”
- Click on “Upload Files” tab and on button “Select Files” + pick up your PDF file from your computer.

The screenshot shows the WordPress admin interface for editing a post titled "Syrian Food". The post content area contains the following code: `[pdf-embedder url="http://shaikes.com/wp-content/uploads/2015/05/BarBat-Mitzvah-Dariy-Royal-Blue-menu.pdf"]`. The interface includes a sidebar with navigation options like Dashboard, Posts, and Media, and a right-hand sidebar with settings for social sharing, publishing, and format.

The screenshot shows the "Insert Media" dialog box with the "Upload Files" tab selected. The "Select Files" button is highlighted with an orange arrow, and the text "SELECT YOUR PDF FILE IN YOUR COMPUTER" is written in orange next to it. The dialog also shows options for "Create Gallery", "Set Featured Image", and "Insert from URL".
